

Digiex – Steps we take to combat copyright infringement

Date last modified: 6th January 2013

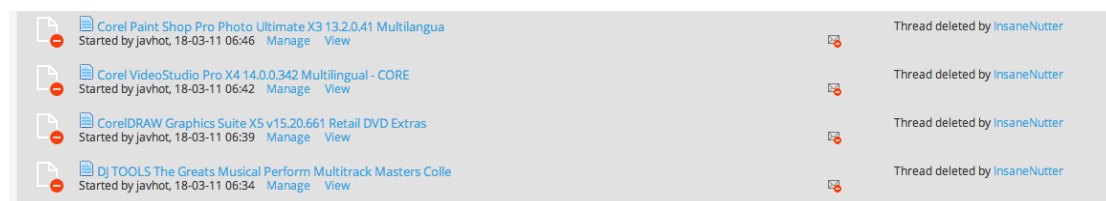

At Digiex, we take our obligations as a service provider seriously, and follow the requirements set out in the Digital Millennium Copyright Act of 1998. Our response time to DMCA takedowns currently stands at under 4 hours, and we have taking various measures to stop users from posting illegal material on our site. In this document we will detail the various steps we have taken.

1.1 Automated Blocking System

Our first port of call to stop material is an automated blocking system, which catches keywords that are usually used to spread copyrighted material.

This has stopped over 5,000 posts from entering our online system. Automated bots posting links to infected material completes most of these, however it does stop a lot of users in the same process. This is a small example of our recycle bin, which contains threads and posts blocked by this system

1.2 Notices to users

We use notices across the site in key sensitive areas (like Console Help and Application downloads) to remind our users that they are not entitled to post any material which is infringing. We also put steps in the right places across a users journey around the site as demonstrated below.

Forum Rules

In order to proceed, you must agree with the following rules:

Although the administrators and moderators of Digix will attempt to keep all objectionable messages off this forum, it is impossible for us to review all messages. All messages express the views of the author and the owners of Digix will not be held responsible for the content of any message.

Content on the Download Center is uploaded by users and does not represent Digix. While we try to moderate content as much as possible, it is your responsibility as a user to ensure you have permission to upload any content that you post.

I have read, and agree to abide by the Digix rules.

 Welcome to Digix's Guides and Reviews, all content is created by members, for members in their own free time. We hope you find our content useful, and encourage you to contribute a guide for something you know how to do. Anyone is welcome to share their own content, sharing is caring after all!

All we ask is you please don't copy + paste our content elsewhere, please link back to it here if you think its worth sharing. Likewise if one of our members has copied a guide word for word please report it on the forum or via our [DMCA Takedown Request Form](#).

 Welcome to the Digix Download Center, you are welcome to download anything you like here, no registration is required! We offer direct download links with no captchas or wait times. Members are also encouraged to [upload legal content to our FTP](#), then share it on the forums. Content must be legal (e.g. game demos, freeware applications) and suitable for one of our download categories. We do our best to ensure no content infringes copyrights, and provide a [DMCA Takedown Request Form](#) to request the removal of content from Digix

 **Important! Please Read:** Your welcome to discuss modding consoles and related homebrew, dashboards, tweaks and hacks. Just ensure you never ask or help others with pirating copyright material. Any posts or threads which mention copyrighted material will result in post deletion and loss of reputation. We are not a forum for helping you steal content.

 **Important! Please Read:** Your welcome to discuss modding consoles and related homebrew, dashboards, tweaks and hacks. Just ensure you never ask or help others with pirating copyright material and NEVER upload pirated material. Any posts, threads or downloads which mention or contain copyrighted material will result in post deletion and loss of reputation. We are not a forum for helping you steal content.

1.3 Reporting System

We have a robust reporting system in place, both on the site and via our DMCA Takedown Form, which will alert all staff members with the relevant permissions to investigate and remove posts straight away. Our usual lead-time is less than an hour, and the longest it's ever taken is 4 hours, which is faster than most other commercial sites act on reports. We are proud of our response time.

Digix DMCA Form

Please use the below form to contact the DMCA Takedown Agent responsible for Digix.

Digix is a community forum designed for members to be able to make threads and posts on a range of topics. Users regularly post up reviews or guides which may have associated downloads needed for them. We provide this service to users who have to agree to our terms and conditions that clearly state they are responsible for content they post and must be legally in a position to post the content in question. Due to the high volume of user generated content and the inability to police such a volume in real time it does mean at times, content can go on the site which isnt authorised of which Digix has no knowledge of.

Section 512 of the Digital Millennium Copyright Act (DMCA) protects online service providers (OSPs) like Digix from liability for information posted or transmitted by subscribers if they quickly remove or disable access to material identified in a copyright holder's complaint.

Under the conditions of the Digital Millennium Copyright Act of 1998 the copyright owner of a digital work is entitled to file a Takedown Request (section 512) which notifies us that Digix may be hosted or linking to copyrighted material.

From the DMCA 1998 Section 512:
"Under the notice and takedown procedure, a copyright owner submits a notification under penalty of perjury, including a list of specified elements, to us (Digix). Failure to comply substantially with the statutory requirements means that the notification will not be considered in determining the requisite level of knowledge or infringement by us. If, upon receiving a proper notification, we promptly remove or block access to the material identified in the notification, we are exempt from monetary liability. In addition, we are protected from any liability to any person for claims based on its having taken down the material. Penalties are provided for knowing material misrepresentations in either a notice or a counter notice. Any person who knowingly materially misrepresents that material is infringing, or that it was removed or blocked through mistake or misidentification, is liable for any resulting damages (including costs and attorneys' fees) incurred by the alleged infringer, the copyright owner or its licensee, or us."

We will act on any DMCA requests within 24 hours and any completed takedown notices which are filled in correctly will be actioned quickly by the Digix DMCA Agent.

If you are (or if you represent) the copyright owner of content or links on this website then please complete the form below. All fields are mandatory and both tick-boxes must be ticked. An incomplete or unticked submission will not be considered a proper notification under the terms of the act.

* Required

Infringed work name *

Summary

This demonstrates how Digiex follows the requirements set out in the Digital Millennium Copyright Act of 1998 and in most cases, exceeds the requirements by a large mile. Digiex is committed to operating within the law and take our obligations as a service provider seriously.
